

# HardiePlank™ siding

Easy to cut

Easy to install

Low maintenance

Vermin resistant

Highly durable

Fire resistant

Sustainable

## Character without compromise

**HardiePlank™** siding is a colourful and versatile weatherboard made of fibre cement that offers all the texture and natural beauty of timber while delivering the maintenance-free durability of new-generation Engineered Cement Composite.

## Enjoy full flexibility to design

Available in 21 colours, **HardiePlank™** siding offers great flexibility to design. Moreover, you can choose from two textures. **HardiePlank™** siding are installed on wooden or metal subframes. Our planks can be used for horizontal, vertical, or even diagonal applications, opening the way to a wide variety of shading, angles and other detail effects. The combination with the complementary **HardieTrim™** siding profiles allow you to maximise your creativity in façade design.

## 10 years limited warranty

**HardiePlank™** siding Cedar has the most realistic wood structure in the market and comes in 14 different patterns. But contrary to wood, our 10-year limited warranty ensures you that it will keep its superb finishing, without cracking, peeling or chipping, regardless of the climate conditions. **HardiePlank™** also resists fire and insect and vermin damage.

## Quick and easy to install

Without the need to predrill, **HardiePlank™** siding is nailed or screwed, thus offering a simple, quick and economical solution.

## Applications

**HardiePlank™** siding is designed for interior or exterior use in residential, commercial and light industrial buildings, new or renovated.
